

Recurring Date Picker Component

To run the recurring date picker component built with [Next.js](#) and Zustand , follow these steps:

Prerequisites:

[Node.js](#):

Ensure you have [node.js](#) installed on the machine. You can download it from [nodejs.org](#).

Npm or yarn:

These package managers come with node.js you can use either to install dependencies.

Steps to Run the Project Locally

1. Clone the Repository: If you have created a GitHub repository, clone it to your local machine using the following command

```
git clone https://github.com/yourusername/your-repo-name.git
cd your-repo-name
```

2. Install Dependencies: Navigate to the project directory and install the required dependencies. You can use either npm or yarn:

```
npm install
```

3. Run the Development Server: Start the Next.js development server with the following command:

```
npm run dev
```

4. Open in Browser: Once the server is running, open your web browser and go to `http://localhost:3000`. You should see your recurring date picker component in action

.
